MATRIS Reading, Summary / Recommendation

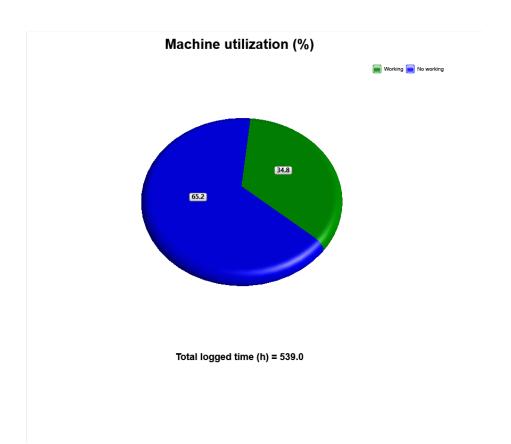

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

Main equipment	Туре	Equipment	
	X3 piping		
	Main Attachment		
	Hydraulic Fluid		
	X1 Piping		
	Hose Rupture Valve on Arm		
	Hose Rupture Valve on Boom		
	Attachment Interface		

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

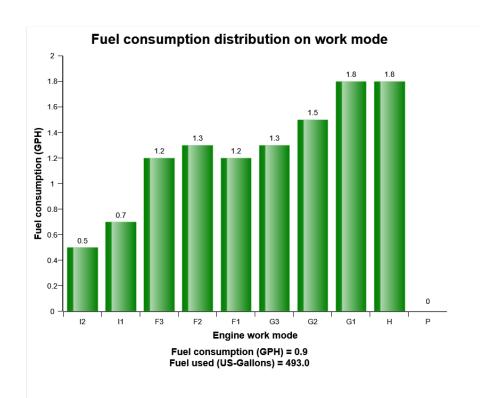

The graph shows the distribution of the operating time for the machine. The operating time is defined as the time with engine on

Blue sector = Engine is running, but attachments and tracks are not moved or operated .

Green sector = Machine in work with the move of attachments and tracks

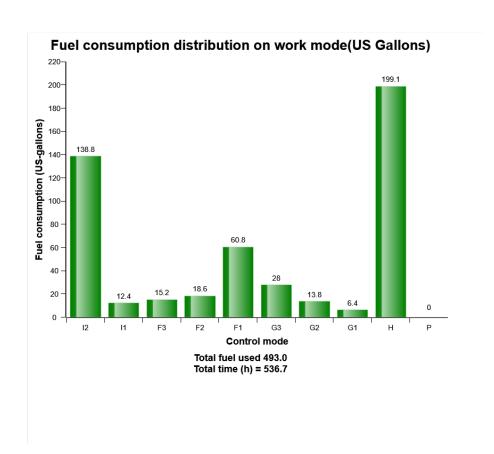

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

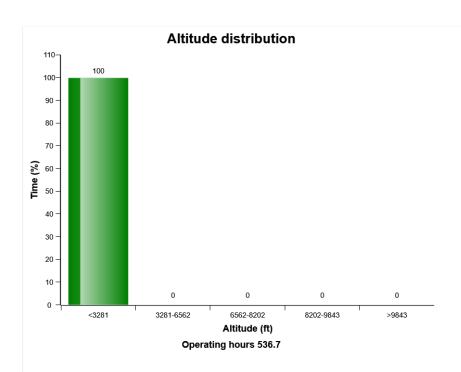

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

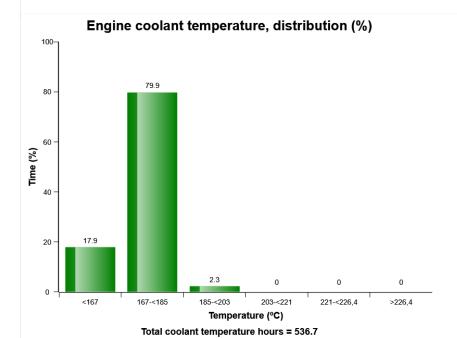

The diagram describes the amount of fuel consumed per engine speed mode distribution.

Total amount of fuel consumed (m3) in above means that the sum of the fuel while it consumed for engine ON. The values above distribution were calculated from theoretical calculation with logged data in V-ECU so it can be some different from actual performance in field.

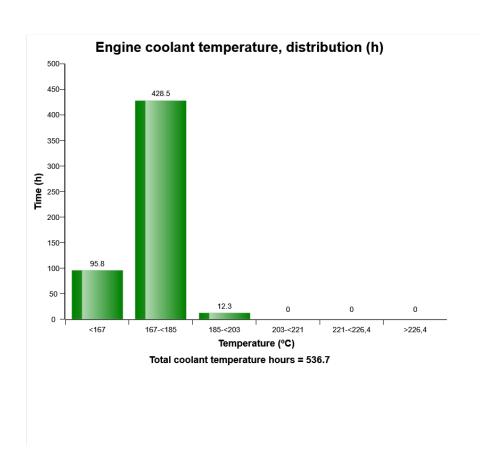

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The graph shows the time distribution of the temperature, while engine running.

#### Explanation:

Y-axis: Time

X-axis: Temperature distribution in classes.

Blue bar = Warm-up phase.

During the engine warm-up phase, this temperature region is passed.

It is normal to have registrations in this region.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

Green bar = Normal working temperature. The Major part of the registrations shall be in this region.

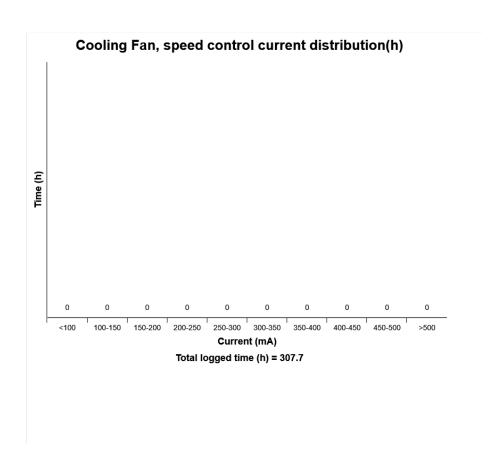

Yellow bar = High working temperature. It is normal to have some registrations in this region.

Red bar = Alarm.

Registrations in this region is not normal, running in this region may cause severe damage.

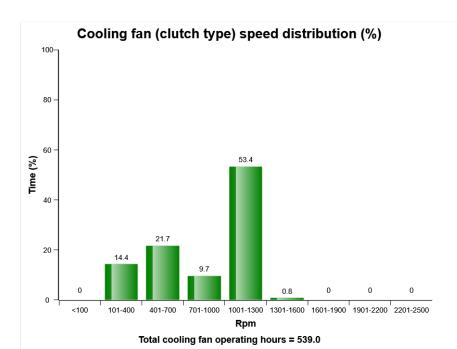

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

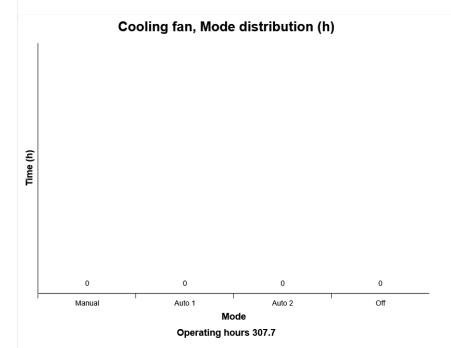

The diagram describes Hydraulic Cooling fan speed control, Current (mA) distribution, on fan speed Control..

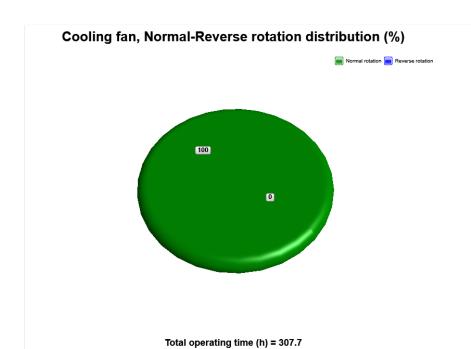

Total time (hours) in above means the sum of the time for Hydraulic Cooling fan operation.

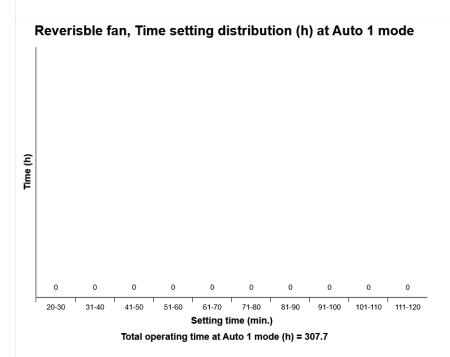

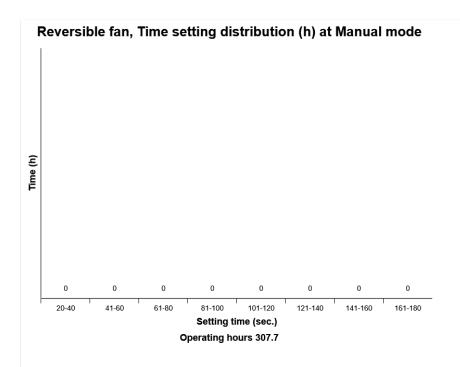

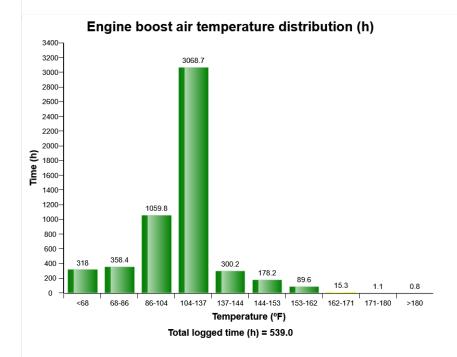

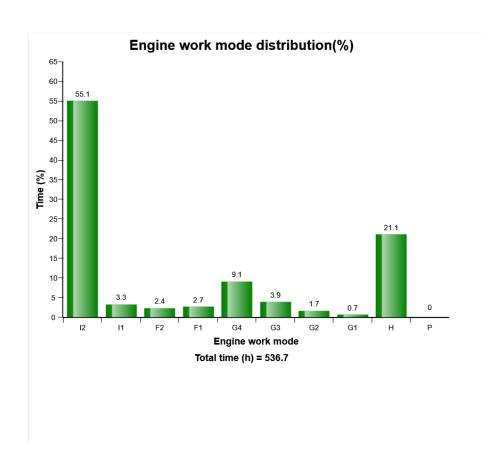

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

This diagram shows the distribution of the engine work mode in time percent.

Distribution of each work mode is shown on top of the column in percentage.

#### **Explanation:**

Y-axis: The percentage of the operating hours on each work mode.

X-axis: The engine work mode (10 step in total)

Distribution of each work mode is shown on top of the column in percentage.

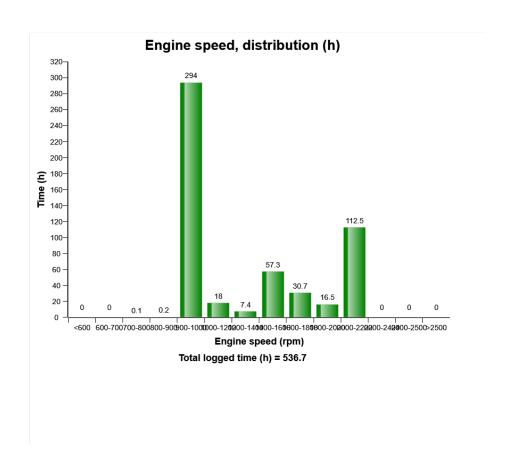

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The sum of time distribution in percentage is 100

Total time (h) is listed below the diagram

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The graph describes the engine speed distribution, in hours.

The sum of all bars = total time of engine running.

#### Explanation:

Y-axis: Engine running time in hours.

X-axis: Engine speed in rpm.

Green bars = Normal engine speed range.

Red bars = The engine speed has exceeded the maximum design speed.

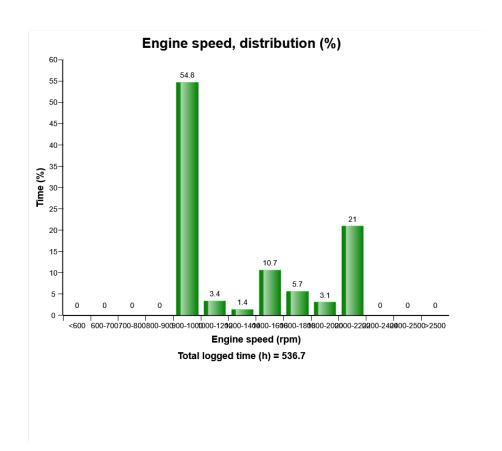

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

Exceeding the maximum design speed may cause severe damage to the engine.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The graph describes the engine speed distribution in percent of time.

The sum of all bars=100% of engine running time.

#### Explanation:

Y-axis: Engine running time in percent.

X-axis: Engine speed in rpm.

Green bars = Normal engine speed range

Blue bar = Idling interval.

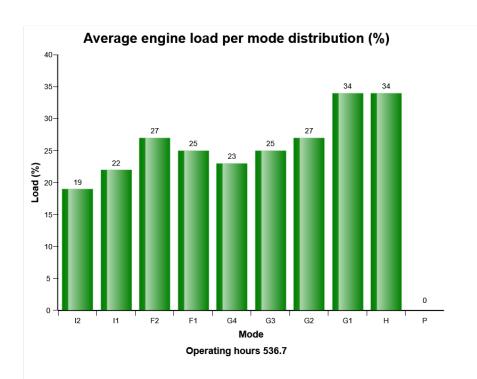

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

Red bars =The engine speed has exceeded the maximum design speed.

Exceeding the maximum design speed may cause severe damage to the engine

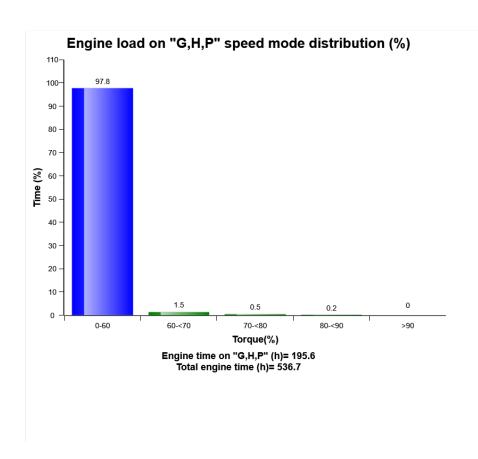

Machine model	SerialNo	Operating Hours	Reading Date	
EC140E	310219	538.7	10/07/2019	

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

This graph shows the distribution of the engine load.

Blue bar: Low load

Green bar: Normal load

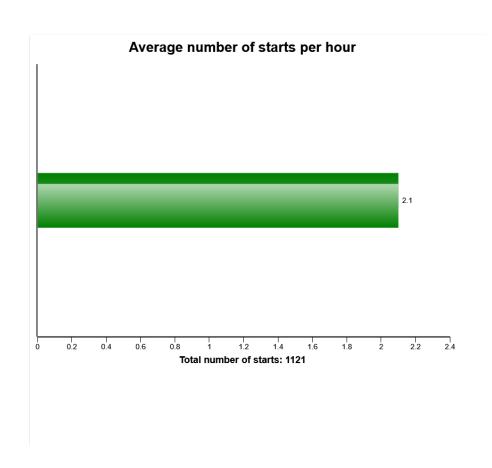

Yellow ba r: Excessive load

Load distribution for each bar is shown on top of its column in percentage.

The sum of bars is 100%.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The graph describes the average number of engine starts per engine running hour.

#### Explanation:

X-axis: Number of average starts per hour.

The actual time used for calculation, is time with engine on

If the fuel consumption is high one reason may be that the engine is not turned off often enough, perhaps machine is left idling for long periods. Check " Machine utilization".

The value can vary a lot depending on in which application the machine is used.

To see at which different temperatures engine is started see" Start at different engine temperatures."

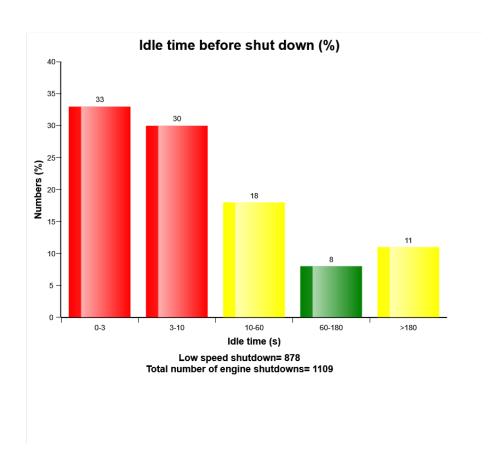

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

Green bar = Number of average starts per hour

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

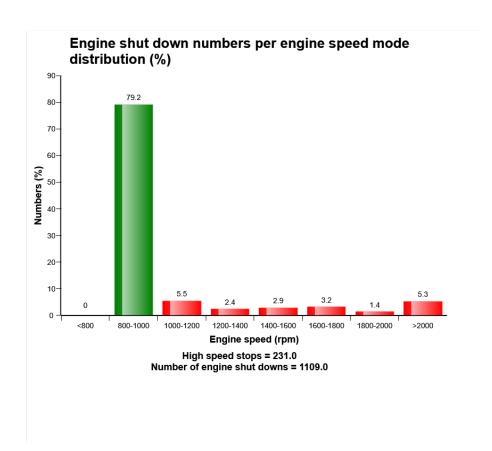

This graph shows the distribution of delayed time at low idle speed until the engine is turned off.

The delayed time distribution for each bar is shown on top of its column in percentage.

The sum of bars is 100%.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The diagram shows the number of stops at high idle (I1 ~ P mode).

Green bars = Normal engine stop

Red bars = Abnormal engine stop

Engine stops at a high idle can cause server damage to the turbo charger due to shortage of the oil lubrication. The engine should be stopped at low idle(I2 mode).

#### Explanation:

Y-axle: Number of engine stop at each work mode.

X-axle: Work mode.

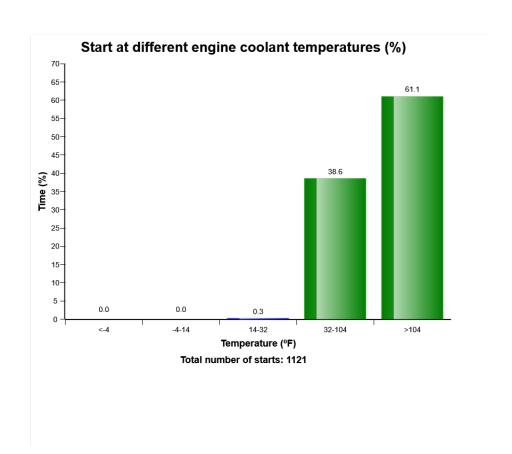

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

Distribution of each work mode is shown on top of its column in number.

Total number of shut down is listed below the diagram.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The graph shows the distribution of engine coolant temperature, at the starting moment.

#### **Explanation:**

Y-axis: Number of engine starts

X-axis: Engine coolant temperature.

A great proportion of engine wear is due to cold starts. Try to avoid extremely cold starts. Try using an electric coolant heater.

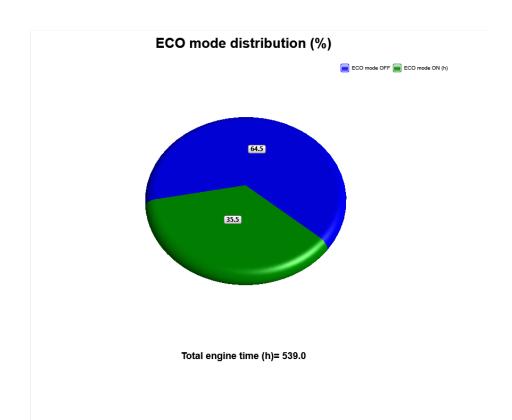

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

Under the graph the total number of engine starts is displayed.

Also see " Number of starts / hour" to get a complete picture of engine starting.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

#### Definition :

This type of table shows the latest occasions when a specific event has occurred. When a specified criteria is fulfilled a registration is made. Each table row corresponds to one occasion. Operating hours is displayed in the first column, followed by year, month , day , hour and minute to show when

## Duration (minutes)

Volvo Construction Equipment Customer Support

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

an event has occurred.

The rows are not ordered chronological (The latest event may be in the middle).

Only one event per minute is registered.

Over the table the total number of events is displayed

#### Criteria:

In order for an occurrence of low engine coolant level to be recorded in a data point, the count to increment by 1 the engine coolant level state must change from "normal" to "low."

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

### Definition :

This type of table shows the latest occasions when a specific event has occurred. When a specified criteria is fulfilled a registration is made. Each table row corresponds to one occasion. Operating hours is displayed in the first column, followed by year, month, day, hour and minute to show when an

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

event has occurred.

The rows are not ordered chronological (The latest event may be in the middle).

Only one event per minute is registered.

Over the table the total number of events is displayed.

Duration:

The duration of each event is shown after the timestamp of the event.

The duration is counted as long as the criteria is fulfilled.

Extreme value:

The extreme value column displays the most extreme value during the event.

Criteria:

The criteria to get an registration, is that the alarm signal for high engine coolant temperature is active and that the diesel engine is running.

The graph shows the total time of AC compressor engagement.

## **Explanation:**

Green bar: Total time in hours, AC compressor has been engaged.

Under the graph the total engine running time (in hours) is displayed.

Total number of AC compressor activations is also displayed.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The graph shows the time distribution of the temperature, while engine running.

## Explanation:

Y-axis: Time

X-axis: Temperature distribution in classes.

Blue bar = Warm-up phase.

During the engine warm-up phase, this temperature region is passed.

It is normal to have registrations in this region.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

Green bar = Normal working temperature. The Major part of the registrations shall be in this region.

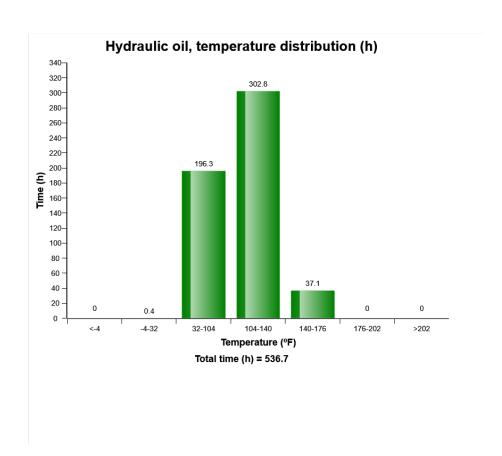

Yellow bar = High working temperature. It is normal to have some registrations in this region.

Red bar = Alarm.

Registrations in this region is not normal, running in this region may cause severe damage.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The graph shows the time distribution of the temperature, while engine running.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

T he diagram describes Power boosted operating time distribution, when main relief pressure increases on working operation modes. In this diagram, the sum of time (%) of each working operation mode can exceed 100%. It means that customer has been operated several working operations at the same time.

Total operating time with power boosted (hours) in above means sum of the time for Hydraulic Power boosted operation. The base for the percentage calculation is Total operating time with power boost. Time(%) on each working operation mode except travel and F mode above is the time, after the operator press power boost button on the joystick and until main relief pressure is recovered to default pressure.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

This graph shows operating hour distributions on each travel speed for total travel time.

Blue sector: Travel switch in low position

Green sector: Travel switch in high position

#### Explanation:

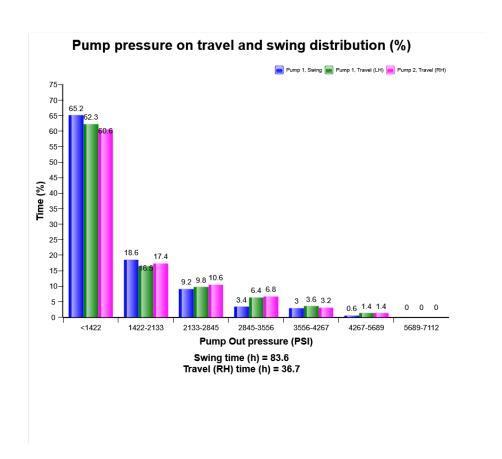

Distribution of each travel time is shown on right of its sector in percentage

The sum of travel time in percentage is 100

Total travel time is listed below the diagram

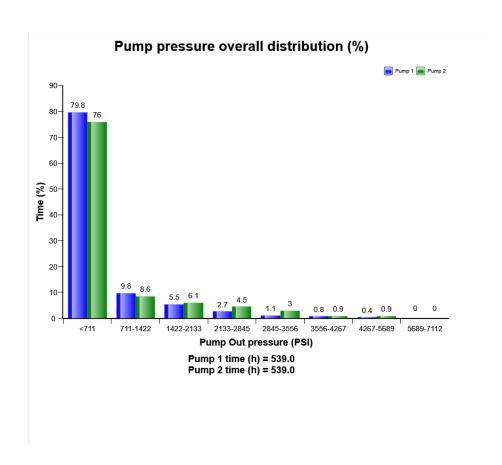

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The diagram describes Pump outlet pressure of 2 Pumps for travel and swing operation distribution. In case operator use several operations at the same time, this pressure distribution for travel and swing operation can be different from actual operating pressure distribution for travel and swing operation in field.

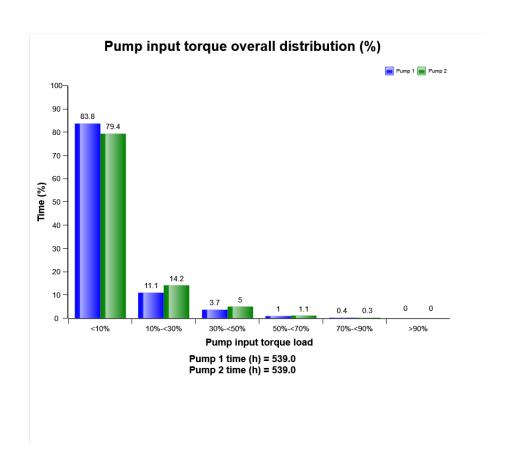

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The diagram describes Pump outlet pressure of 2 Pumps distribution.

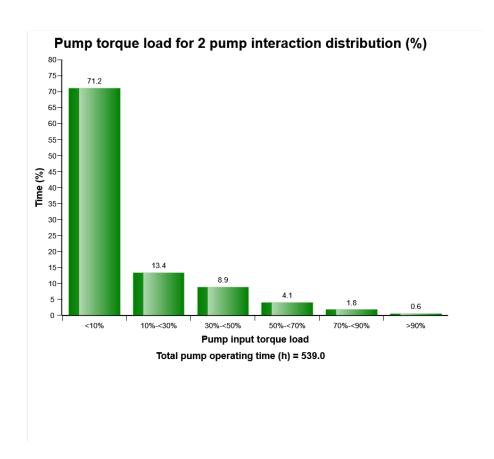

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

The diagram describes Pump torque load of 2 Pumps distribution.

Machine model	SerialNo	Operating Hours	Reading Date
EC140E	310219	538.7	10/07/2019

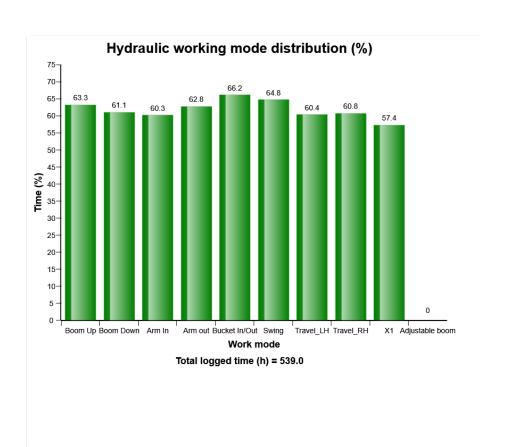

This is to see total torque load distribution of 2 pumps when it operates 2 pumps at the same time.

The diagram describes total Pump torque load for 2 Pump's interaction distribution

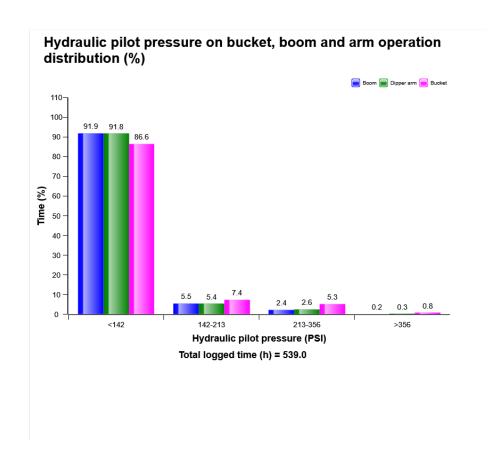

Machine model	SerialNo	Operating Hours	Reading Date
